SUBJECT: SLOVENIA: NO OBJECTION TO CONSENSUS ON NUCLEAR  
SUPPLIERS GROUP GUIDELINES

REF: SECSTATE 126581

(SBU) On December 9, Emboff delivered information in reftel to Igor Grlicev, Head of International Cooperation, and Maksimilijan Pecnik, head of the Division of Radiation Safety and Materials, at the Slovenian Nuclear Safety Administration. Grlicev and Pecnik stated that they had no official position on the amended text for paragraphs 6 and 7 of the Part 1 NSG Nuclear Guidelines on control of transfers of ENR equipment. They added that they believed that no response implied no objections, and therefore was the same as a positive response. They said that for now, while Slovenia will not officially take a position, Slovenia has "no problem with consensus."
